Objective

Today, the global mining community faces significant challenges, ranging from technological to social, environmental and economic issues. The mining community has confronted and solved such challenges over centuries and has thereby delivered important contributions to the use and development of our mineral resources.

The international exchange of professionals from industry, academia and governments helps to gain “knowledge to resource the future”.

Topics

Abstracts are invited in the following theme areas:

• Technological advances and innovation
• Best practices and benchmarking
• Responsible and sustainable mining

Call for Papers

Authors are invited to submit abstracts (up to 1800 characters) for possible inclusion as poster or oral presentation in the Conference program. Abstracts are to be submitted electronically via the Conference portal. (Abstract submission is due by 1 March 2018).

Key Notes

Prof J Brune, Colorado School of Mines, USA
Prof B Johnson, Bangor University, UK
Dr Kathryn Moore, Camborne School of Mines
Domenic Roberts, Mineco Ltd, UK

Features

• Welcome reception
• Keynote speakers
• Key subtheme sessions
• Exhibitions by industry
• Sponsoring opportunities
• Networking
• Dinner party in the Coronation Hall
• Conference language: English
• Presentations on the EU Horizon 2020 IMP@CT project

Conference Venue

PPS Auditorium, Prof.-Pirlet-Straße12, Aachen, Germany
