

RWTH Graduate Survey Starts

As in the past four years, we invite former RWTH students to take part in survey about their studies at RWTH and their professional career so far. The graduates are invited to participate about one and a half years after graduation.

In the upcoming survey period, we will contact about 4,600 graduates from the examination cohort of 2011 (i.e. degrees completed in WS 2010/11 and SS 2011). The survey form consists of two parts; the first part contains questions on the course of the degree program, study conditions, and the acquisition of competencies, the second part contains questions on the graduates' entry into the job market and their current job situation. It is the aim of the project to analyze the graduates' retrospective assessment of their degree courses and thus to make it possible to further improve study conditions and student preparation for employment as part of the quality management in teaching.

In this way, RWTH Aachen meets the performance agreements between the Federal State of NRW and the University as well as the requirement by the Accreditation Council to conduct annual graduate surveys.

RWTH needs your feedback!

In order to obtain results that are as representative as possible, we are glad about every completed questionnaire. So please pay attention to the letter from the RWTH Graduate Survey! The letter contains a personalized access code to the online questionnaire, which makes anonymous participation possible. As a matter of course, participation is voluntary. If you belong to the group of potential participants, i.e. the relevant degree cohort, but have not received the graduate survey letter, we apologize! Please contact us and register by email for the survey.

Results from previous surveys are available for download from our website.

Survey period: October 4, 2012 to February 17, 2013
