The principles of fair and open competition apply and appointments will be made on merit.

## **Full Professor (W2) in Psychology of Work and Engineering Psychology**

Faculty of Arts and Humanities

---

We are seeking qualified applicants for teaching and research in the area of the psychology of work and engineering psychology. The starting date is summer semester 2020.

The Institute of Psychology seeks to strengthen its applied focus in the area of work psychology and to sharpen it through research on the impact that technological innovation in working conditions has on human cognition and behavior. For this area, RWTH Aachen offers excellent opportunities for interdisciplinary integration of psychology with sciences and engineering in the context of RWTH's mission statement of an "Integrated Interdisciplinary University of Science and Technology." Experience in interdisciplinary collaborations and the willingness to expand these are expected.

The research on work and engineering psychology is expected to be focussed on psychological aspects of the human-machine interface. We expect a primarily experimental approach with openness for other methods. Research may pursue both applied and basic human factors questions. An international publication record and acquisition of third-party funds are expected. The professorship will teach in the B.Sc. and M.Sc. Psychology curricula in the area of work and engineering psychology as well as in psychological methods.

A Ph.D. degree is required; additionally, Habilitation (post-doctoral lecturing qualification), an exemplary record of research achievement as an assistant / an associate / a junior professor or university researcher and/or an outstanding career outside academia are highly desirable. Ability in and commitment to teaching are essential. The application should include supporting documents regarding success in teaching. German is not necessary to begin but will be expected as a teaching language within the first 5 years.
