

## **External Advert / Role Profile Draft:**

### **Commercial Graduate / Business Intern**

#### **Our Company**

Mitsubishi Chemical Europe GmbH is a wholly-owned subsidiary of Mitsubishi Chemical Corporation. With 42,000 employees from 378 affiliated companies in 32 countries we are a major force in the chemical industry. At our Regional Headquarters for Europe we promote the collaboration between each group company in Europe and central resources in Japan.

We are passionate about sustainability and respect for the environment. They are key elements of a powerful concept that we call KAITEKI and it's at the very heart of why we are in business. We're working on developing our processes to help us to reduce our environmental footprint and make a difference to the local community wherever we are. To continue our success, we need your talents.

#### **The Opportunity**

This two-three year program will provide commercial training in two or three business domains across our group of companies. The role requires you to be fully mobile as your placement rotation/s will require you to relocate for each assignment. Locations could include Germany, the UK, Belgium, the Netherlands and Japan.

Your daily activities will be diverse and may include placements working on projects in Global IT, Sales and Marketing, Purchasing, Production Control and Quality. This is an opportunity to learn various businesses within the Mitsubishi Chemical Europe Group and build your knowledge and experience in a growing company and continuously evolving industry.

You'll get to work on real issues and we'll provide you with a personally tailored support and development programme, including senior manager mentoring, to help you achieve your full potential and make an impact on the business.

#### **The skills we're looking for:**

You must have (or expect to have) a degree in International Business and languages and/or a Masters' Degree in a relevant technical discipline such as Materials Science / Engineering, Mechanical Engineering, Chemical Engineering or similar. As the position will require you to relocate internationally for each assignment, previous experience living/working/studying abroad is highly desirable.

We're looking for highly driven individuals who want to build a strategic career and have the potential to become the future leaders in our company.

Given the nature of our business, excellent verbal and written English language skills are essential. Intermediate or fluent language capabilities in Dutch, German, or Japanese would be advantageous.

Safety is a high priority for Mitsubishi Chemical and so you should demonstrate an awareness of EHS principles, along with a collaborative working style, resilience, and a global mindset.

If you want to join an organisation that will offer you a personalised development program leading to an exciting international career we would love to hear from you.
