

Internship/master thesis opportunity abroad

Target Group

Master students of Faculty 5, interested students of Faculties 3 & 4 may apply as well. Due to the project time constraints, only EU students are asked to apply for the position.

General information

The position is paid and students may be eligible to secure additional funding from Erasmus+ or other possible resources.

The activity can be arranged for 3-6 months at a R&D site of our industrial partner in Velsen Noord, the Netherlands.

The research activities will be focused on analysing thermo-mechanical behaviour of refractories. Refractories are quasi-brittle materials employed as the insulating lining of high temperature metallurgical vessels ...

Interested applicants shall forward the followings to *Tadaion@ghi.rwth-aachen.de*

- CV including any relevant experience/course passed.
- Availability during the upcoming winter semester and following summer semester.
