ERS-Forum
Support for New Research Ideas
Open Call

The Exploratory Research Space @ RWTH Aachen (ERS) is a structure to support the generation of new and unconventional research ideas. ERS-Forum organizes meetings and events aiming at overcoming the frontiers between different disciplines and giving leeway to both senior and junior researchers for creativity and fostering interdisciplinary exchange and discussion.

1. Types of Measures
The call is open for all interdisciplinary research topics. The topics should be new, creative and can be of high risk. They should not already be addressed by national or international public funding programs. The proposed measures should aim at the identification and exploration of new interdisciplinary research fields or the development of new methods and methodologies between interdisciplinary research topics. Activities that can be supported by ERS-Forum are, e.g., meetings of small core groups, presentations, workshops, colloquia and symposia. Formats can vary from information, strategy and creativity workshops to “open space” and future labs managed by a professional moderator.

2. Selection and Evaluation Criteria
Proposals are reviewed by the ERS Steering Committee. Evaluation criteria are:
- original and interdisciplinary research topic
- adequateness of proposed activity to further develop this topic
- novel or unconventional approach
- team should not only consist of “best friends” and be interdisciplinary and divers with regard to age, career level, nationality, gender, …

The proposal should clearly address the subject: Why is the topic important, what is the driving force for the intended research (scientific challenge, possible applications, societal needs, …), what is the “incentive tick”?

Furthermore, the goal of the proposed activity must be defined, e.g., a joined research proposal, establishing a new research focus at RWTH Aachen University.

For evaluation after completion of the supported activity, a short report on results and follow-up activities is requested.

3. Funding
The budget of ERS-Forum is provided by the excellence initiative of the German federal and state governments. The support is intended to be “incentive money” promoting initiatives and activities for the development of new research topics that cannot be funded by other sources. Eligible costs are: rent for meeting venue, external moderation, travel costs for invited speakers, support of workshops and meetings etc.

4. General Conditions
- Research partners: at least 2 researchers from different faculties and disciplines
- Progress evaluation: report (approx. 1 page) on outcome and/or follow-up measures contemporary to supported measure

5. Proposal Structure and Content
- Length of proposal: 2 pages max., type size: Arial 11, line spacing: 1.5, Language: English or German
- Project partners
- Summary
- Background, motivation and approach of proposed activity
- Possible agenda
- Expected long term impact
- List of possible participants
- Cost frame

6. Further Information and Application
This is an open call. Please submit your proposal any time via email to:
